

As an Educational Institution;

Our primary goal is to contribute to raising individuals who are aware of the values of their country, have a high environmental awareness, respect nature and people, embrace the principle of sustainable energy, and are lifelong learners; to be innovative, to reason, to be holistic, and to continuously improve quality, environmental, occupational health and safety, and energy management systems. In pursuing this aim, the best interests of the student take precedence over the wishes and expectations of all other parties involved.

In addition to this, we are also responsible for providing a safe and healthy environment for everyone in our campus, for decreasing the damage we inflict on the environment, for contributing to and protecting the balance of nature on campus and for ensuring the efficient use of energy.

Our students, their parents, our employees, visitors, suppliers and subcontractors are included in our responsibility.

Within the scope of our current Quality, Environment, Occupational Health and Safety, and Energy Management System, our organization is committed to;

- fulfill the requirements of the T.R. Ministry of National Education, VKF, and other national and international authorities to which we are affiliated,
- ensure the existence of information and resources necessary for the realization of the objectives and targets of the Management Systems;
- fulfill the legal and other requirements related to our activities in order to protect the environment, create a healthy and safe working environment, and use energy efficiently,
- support the acquisition of equipment and services that ensure efficiency in Quality, Environmental, OHS and Energy performance,
- support design activities that consider the improvement of Quality, Environmental, OHS and Energy performance,
- provide a safe and healthy working environment on our campus, prevent injuries and health deterioration and combat epidemics,
- prevent pollution and damage to the environment caused by our activities and protect nature so that the vegetation and living beings we live in are not adversely affected,
- eliminate hazards and reduce risks by managing OHS risks,
- Consult the employees and their representatives and ensure their participation,
- Ensure clear and transparent communication regarding management systems,
- Involve our colleagues in Quality, Environment, OHS, and energy management systems to increase their positive contributions, encourage them, and provide the necessary training.
- Ensure continuous improvement of Quality, Environment, Occupational Health and Safety, and Energy performance and Management Systems, while also considering student and parent satisfaction.

Güray ERKOL  
Director General
